Energy Performance Certificate

Bedford Drive FAREHAM PO14 4FH

Date of certificate: Date of assessment: Dwelling type: Ground-floor flat

Type of assessment: Reference number: 2458-9049-6349-9852-0990 SAP, new dwelling 57.67 m² 25 January 2012 25 January 2012

Total floor area

This home's performance is rated in terms of the energy use per square hased on fuel costs and environmental impact based on carbon dioxide metre of floor area, energy efficiency (CO_2) emissions.

Not energy efficient - higher running costs England & Wales (39-54)(55-68) ery energy efficient - lower running costs **Energy Efficiency Rating** (69-80) (92 plus) D a EU Directive 2002/91/EC Current 79 Potential $^{\infty}$

the more energy efficient the home is and the lower The energy efficiency rating is a measure of the overall efficiency of a home. The higher the rating the fuel bills are likely to be.

Not environmentally friendly - higher CO2emissions Very environmentally friendly - lower CO₂emissions England & Wales (39-54)(81-91) (92 plus) Environmental Impact (CO₂) (69-80) (UU M **G** EU Directive 2002/91/EC Rating Current 00 (4) Potential 00 44

carbon dioxide (CO₂) emissions. The higher the rating the less impact it has on the environment. home's impact on the environment in terms of The environmental impact rating is a measure of a

Estimated energy use, carbon dioxide (CO₂) emissions and fuel costs of this home

	Current	Potential
Energy use	114 kWh/m²per year	109 kWh/m²per year
Carbon dioxide emissions	1.2 tonnes per year	1.2 tonnes per year
Lighting	£52 per year	£38 per year
Heating	£228 per year	£230 per year
Hot water	£71 per year	£71 per year

they are unlikely to match an occupier's actual fuel bills and carbon emissions in practice. The figures do not include the impacts of the fuels used for cooking or running appliances, such as TV, fridge etc.; nor do they reflect the costs associated with service, maintenance or safety inspections. Always check the certificate date because fuel prices can change over time and energy saving recommendations will evolve standardised running conditions (heating periods, room temperatures, etc.) that are the same for all homes, consequently The figures in the table above have been provided to enable prospective buyers and tenants to compare the fuel costs and carbon emissions of one home with another. To enable this comparison the figures have been calculated using

Remember to look for the Energy Saving Trust Recommended logo when buying energy-efficient products. It's a quick and easy way to identify the most energy-efficient products on the market.
